Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The drawings are objected to because cross-hatching is apparently missing from Figs. 1 and 2. Correction is required.

Applicant is required to submit a proposed drawing correction in response to this Office action. Any proposal by applicant for amendment of the drawings to cure defects must consist of two parts:

a) A separate letter to the draftsman in accordance with MPEP 608.02(r); and

b) A print or pen-and-ink sketch showing changes in red ink in accordance with MPEP 608.02(v).

IMPORTANT NOTE: The filing of new formal drawings to correct the noted defect may be deferred until the application is allowed by the examiner, but the print or pen-and-ink sketch with proposed corrections shown in red ink is required in response to this Office action, and may not be deferred.

2. The disclosure is objected to because of the following informalities: page 7, line 4, "11" apparently should be --18--, and line 13, "16" apparently should be --13--.

Appropriate correction is required.

3. Claims 3-8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must refer to other claims in the alternative only (claim 3), and must not depend from any other multiple dependent claim (claims 4-8).

Art Unit: 3751

See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

4. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Proper antecedent basis for the "device" set forth in claim 1 (lns. 2 and 4), "feature" set forth in claim 2, and the "method" set forth in claims 9 and 10, could not be found in the specification.

5. Claims 1, 2, 9 and 10 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The invention referred to in the claims is insufficiently disclosed to enable one skilled in the art to understand the structure of, and cooperation between, the elements which comprise same. For example, how cover C functions to control a urine outlet is neither disclosed nor evident to the examiner. The cover appears to seal blocking hole 12 in both positions thereof via seal B and plug 11. ^{pg. 10} Moreover, what is meant by plugs 11 and 18 "snapping" is not evident to the examiner.

Art Unit: 3751

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1, 2, 9 and 10, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Campbell.

The Campbell reference discloses a device comprising: a device for opening a urine outlet 7; a device for closing a urine outlet 7; and a feature 20, as claimed.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The Kirby, Jr. and Strachan, Jr. references disclose various devices having features in common with the instant invention.

9. Applicant is referred to MPEP 714.02 in responding to this Office action.

10. Any inquiry concerning this communication should be directed to Robert M. Fetsuga at telephone number 703/308-1506 who can be most easily reached Tuesday through Thursday.
